

# Connections for stage equipment LS-TYPE

## The Company and the Product

**I.L.M.E. SpA - INDUSTRIA LOMBARDA MATERIALE ELETTRICO** - has been operating in Milan since 1938, in particular in the electrotechnical sector for the manufacturing of equipment for industrial installations.

ILME reflects the traditional **entrepreneurial spirit of Lombardy**, and has enjoyed continuous expansion for over half a century.

The company has carved an important role for itself in the main world markets, also operating directly in the countries that have assumed world leadership in the field of automation, including Germany and Japan.

In the **electrical connection** sector with applications in industrial automation, characterised by **top performance** and utmost **reliability needs**, ILME is today the acknowledged partner of many leading companies worldwide.

The company's fundamental values are:

**product innovation**, original solutions, excellent **price-quality ratio**, a customer-oriented **sense of service**, ethical behaviour and an environmentally-friendly approach.

To promote the continuing improvement of its **qualitative results**, ILME has always encouraged its collaborators to work with utmost **responsibility and participation**. The company focuses on a series of benefits to the user, including research into the most suitable materials, high quality and safe cabling, a rapid turnaround and readily available services.

## CE marking

As from 1 January 1997, in order to launch electrical products on the European market the manufacturer must ensure these bear the relevant CE marking, in line with the Low Voltage Directive 73/23/EEC \* (implemented in Italy as law 18-10-1977 no. 791) and its modification 93/68/EEC \* (implemented in Italy as L. D. 25-11-1996 no. 626/96, published in the supplement to the Gazzetta Ufficiale of 14-12-1996).

The CE marking must be placed on the product - or, if this is not possible, on the packaging, the instructions for use or the warranty certificate - and acts as a declaration by the manufacturer that the product complies with all relevant EU directives.

### ILME products bear the CE marking on the product or packaging.

Almost all ILME products fall within the scope of the Low Voltage Directive. A declaration of compliance is required before applying the CE marking. This document, to which the market is not directly entitled, must be made available to the control authorities (in Italy the Ministry for Industry, Commerce and Handicraft) at all times.

In it, the manufacturer declares the technical safety standard(s) followed to manufacture the product. These standards must be, in decreasing order of preference:

- a European standard (EN prefix)
- a European harmonisation document (HD prefix)
- an international IEC standard
- a national standard
- in the absence of reference standards, the manufacturer's internal specifications, guaranteeing compliance with the directive's basic safety requirements.

Compliance with harmonised technical standards (i.e. ratified by the CENELEC) constitutes presumed conformity to the directive's basic safety requirements.

The CE marking of ILME products results from said products' declaration of conformity to harmonised standards or international IEC standards.

Through the CE marking, ILME declares full compliance, not merely with the directive's basic safety requirements, but also with those

international or national EU standards on which voluntary safety certification markings are based (e.g. IMQ and VDE).

In this way, ILME intends to award the CE marking the value of self-certification in terms of safety, given the loss in legal value of voluntary certifications issued by third parties, ratified by directive 93/68/EEC \*.

Notwithstanding the above, practically all ILME products still bear voluntary conformity markings.

**The above mentioned EU declaration of conformity becomes null and void when the assembly of products includes one or more components not manufactured by ILME and without CE marking.**

### \* Note:

The next legal reference for the Low Voltage Directive was 2006/95/EC, as consolidation of the original Directive 73/23/EEC + Directive 93/68/EEC.

On 29<sup>th</sup> March 2014, the Official Journal of the European Union published the new Low Voltage directive 2014/35/EU dd. 26<sup>th</sup> February 2014, a recast version of directive 2006/95/EC, which is in force since on 20<sup>th</sup> April 2016.

The new **LS-TYPE** enclosures are the ideal solution for the entertainment industry (lighting system power supply and related mixer and dimmer panels), including theatre stages, film sets, radio and TV studios, discos, trade fair booths, concert halls and night public events, both indoors and outdoors, etc.

All parts are in elegant RAL 9005 black to make them suitable for situations and locations where they should not be visible in the dark.

## LS-TYPE connectors

## LS-TYPE Plugs & Sockets

The enclosures are available in the standard sizes 44.27, 57.27, 77.27 and 104.27.

They are designed to accommodate all types of connector inserts (crimp, screw, or spring connections as well as the innovative Squich connection).

CRIMP

SCREW

SPRING

SQUICH

The metal enclosures maintains the same outstanding characteristics as the grey colour versions.

The overall dimensions and the fastening flanges are unchanged from the corresponding traditional versions. Therefore, the new enclosures can be used as an alternative to the classic version.

The levers are made of thermoplastic material and are easy to replace in case of breakdowns due to severe impacts during the set-up and break down of the stages, lighting systems etc.

### EASY LEVER REPLACEMENT

The suffix N identifies the new **LS-TYPE** series:

- CHIN bulkhead mounting housing with lever(s)
- MAPN surface mounting housing high construction with lever(s)
- MFVN hood with pegs top entry high construction
- MFON hood with pegs side entry high construction
- MFVN G hood with lever(s) and gasket top entry, high construction
- CHCN covers with pegs
- CHCN G covers with lever(s) and gasket

The enclosures provide IP65 degree of protection (in accordance with EN 60529) when coupled and locked through the locking levers. The range of operating ambient temperature is  $-40^{\circ}\text{C} \div +125^{\circ}\text{C}$ .

with pegs and gasket, for female inserts with pegs, for male inserts			<b>CK 03 CN</b> (black) <b>CK 03 CAN</b> (black)
with lever and gasket, for female inserts with lever, for male inserts			<b>CK 03 CXN</b> (black) <b>CK 03 CXAN</b> (black)
gasket and screw kit for IP66/IP67 <sup>1)</sup> for CK, CQ 05, CKS inserts	<b>CKR 65</b>		
gasket and screw kit for IP66/IP67 <sup>1)</sup> for CD 07/08 inserts	<b>CKR 65 D</b>		

1) To obtain the protection rating IP66/IP67 a kit is provided that includes a gasket to fit under the insert fixing screws supplied with the kit (see illustrative example)  
CQ 12 inserts are already supplied with a gasket and screw which ensure IP66/IP67 protection rating

## **pluso-N** - Plugs and sockets for LS-TYPE version

**pluso**

These products are the ideal choice for the entertainment industry (to supply lighting equipment and mixer/dimmer assemblies) and are typically used on theatre stages, cinema sets, radio and television broadcasting studios, discos, fair stands, concert halls, public night events, both indoors and outdoors, and similar scenarios.

## pluso-N - Plugs and sockets for LS-TYPE version

pluso

All models share the extraordinary features of the equivalent versions in grey colour.

The elegant colour of all visible plastic parts and the labels in non reflecting grey, which are used only when the markings are not printed, add a touch of discretion and make these products particularly suitable for scenarios and areas where plugs, sockets and cables should be invisible in absence of light.

The range includes several models:

Couplers, flush-mounting, with IP44 protection degree or IP67 on request (couplers and sockets have an IP66/IP67 protection degree).

**NOTE** - Products are available with different voltage and/or frequency and current ratings on request.

# PN...SV coupler plugs - PN...PV coupler socket-outlets LS-TYPE

- PN...SV types 16A (IP44), entry with cable gland colour RAL 9005 black, enclosure colour RAL 9005 black
- PN...PV types 16A (IP44), enclosure and spring lid colour RAL 9005 black, entry with cable gland
- Compliant with EN 60309-1 and -2
- PN...SV types, enclosure and insert in insulating, thermoplastic, self-extinguishing material
- PN...PV types, enclosure, insert and spring lid in insulating, thermoplastic, self-extinguishing material
- Terminals with retained screws
- IP44 degree of protection (EN 60529)
